Summary

CS graduate from IIT Patna with strong DSA fundamentals and full-stack experience. Top projects spanning AI and data analytics, including UniPulse AI (NLP sentiment dashboard), Netflix Data Analysis, an E-Commerce Recommendation Engine, an IT Company Landing Page, and Packed Food Fact. 3x intern in Data Analytics Web Development; GATE 2026 qualified. Seeking SDE/Data Science roles.

Education

Katihar Engineering College, Katihar <i>B.Tech., Computer Science and Engineering – CGPA: 8.34 (current)</i>	2023 – 2027
Indian Institute of Technology, Patna <i>BSc, Computer Science & Data Analytics – CGPA: 8.12</i>	2023 – 2026
CBSE Board <i>Senior Secondary – 88.0%</i>	2021 – 2023
CBSE Board <i>Secondary – 91.0%</i>	2021

Experience

Hcl Guvi <i>Data Analytics Intern</i> - Analyzed digital library usage data via Power BI, improving resource allocation insights by 30%. - Built interactive dashboards to track engagement trends for academic planning.	July 2025 – Oct 2025 <i>India-Remote</i>
Codec Technologies India <i>Data Analytics Intern</i> E-Commerce Sales Forecasting & Recommendation System <i>Python, Prophet, Scikit-learn, Pandas</i> - Built a Prophet forecasting model with 90%+ accuracy to predict regional sales trends. - Developed a hybrid recommendation system, improving product suggestion relevance by 35%.	June 2025 – September 2025 <i>India-Remote</i>
Edunet Foundation <i>Web Dev Intern, MERN Stack</i> Built a Zomato-style food delivery web app with MERN Stack, featuring restaurant listings, cart, and order management.	Mar 2025 – Apr 2025 <i>India-Remote</i>

Projects

Personal Portfolio Website <i>React, Vite, Express.js, Node.js, MongoDB</i> Built a full-stack portfolio website using React (Vite) and an Express/Node.js backend to showcase projects, education, and experience.	sept 2026
UniPulse AI – University Sentiment Analysis Platform <i>React, FastAPI, SQLite, Recharts</i> - Engineered a full-stack sentiment analysis platform processing 1000+ Reddit posts using PRAW and VADER for NLP-based sentiment scoring. - Developed a React (Vite) frontend with real-time dashboards, reducing manual analysis effort by 40%. - Built a scalable FastAPI REST API with SQLite backend for efficient data retrieval and cross-university sentiment comparison.	April 2026
Netflix Data Analysis <i>Python, Pandas, Matplotlib, Seaborn</i> - Cleaned and preprocessed large-scale datasets using Pandas, improving data quality and consistency. - Conducted EDA to uncover trends in content distribution, release patterns, and viewer engagement across genres.	Jan 2025

Technical Skills

Languages: Python, C++, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Git, Google Colab, Jupyter Notebook, Power BI, Tableau

Technologies/Frameworks: MERN Stack, FastAPI, Streamlit, Vercel, Render, Kaggle, GitHub

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PRAW, VADER, Facebook Prophet, Recharts

Core Skills: Machine Learning, Data Cleaning, Feature Engineering, Model Evaluation, Data Visualization, REST API Development
